

Absar Ahmad

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Remote

January 2023 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Doggo Viewer: Built a web-based "dog generator" application, proficiently utilizing **JavaScript** for client-side interactivity and consuming **Web APIs** to fetch and present dynamic dog breed images and unique characteristics.

Azan Finder: Engineered a front-end web application for displaying Islamic prayer times globally. The project demonstrates proficiency in **HTML** and **CSS** for structuring and styling, and **JavaScript** for client-side logic, including asynchronous data fetching from a **Prayer Time API** based on user-provided location.

100Hours Project –

Other Projects: APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

VOLUNTEERING

Free Software Foundation | Boston, MA

March 2023 — Present

Helped organize mailing for end-of-year fundraising campaigns.
