Absar Ahmad

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Remote

October 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Halal Ingredient Checker (Fullstack Web App) – Users can input or search food ingredients to check if they are **Halal, Haram, or Doubtful**. Results are stored in the database, and users can see previously searched items. The app uses crowdsourced votes to improve accuracy, and users can also submit feedback on ingredients.

Movie Tracker (Local Storage Web App) – Users can add movies to their personal watchlist and store them in **local storage**. They can edit details such as title, genre, and rating, mark movies as watched, or delete them from the list. The app keeps the list saved in the browser, even after refreshing or closing the tab.

100Hours Project – **Anki Clone (Fullstack Web App)** – A flashcard learning application inspired by Anki. Built with the **MVC architecture** and includes **user authentication** for secure access. Users can create decks, add/edit/delete cards, and practice with spaced repetition. Developed using **Node.js, Express, MongoDB, Mongoose, EJS, and Passport.js**.

Other Projects: – DoggoApp (Random Dog Generator using async/await with Dog CEO API), Dictionary App (Word lookup with async/await and API integration), Azan Finder (Prayer times via location-based API), Life Decision Bot (Interactive decision maker using async/await with Giphy API), Pokémon Battle Simulator (Turn-based OOP game with async/await),Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

Open Source Contributor – Together (100Devs Community Project) & Volunteer – Free Software Foundation / 100Devs Discord | Remote

Contributed to a large-scale open-source project improving functionality and code quality using MVC architecture and Git/GitHub, and volunteered in the 100Devs Discord community by answering coding questions and helping peers debug projects.
