Absar Ahmad

Software Engineer

SUMMARY

Creative and detail-oriented aspiring software engineer with a strong interest in AI and full-stack development. Skilled in building web applications through personal and academic projects. Eager to contribute and grow at a tech company with global impact..

WORK EXPERIENCE

Software Engineer at 100devs, Remote

October 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Movie Tracker App

Developed a **CRUD-based movie tracking app** using **HTML**, **CSS**, and **JavaScript** that allow users to **search movies**, manage a **watchlist**, and add **ratings/reviews**. Utilizes the **Movie API** and leverages **localStorage** for persistent user data.

Halal Ingredient Analyzer
Built a web tool that lets users input ingredients and checks if they're halal or haram using a custom ingredient list. Users can also search by product name or paste a barcode (using **Web API**). Used **vanilla JavaScrip**t, **semantic HTML**, and simple **CSS** for clean output.

100Hours Project –

Other Projects: Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

VOLUNTEERING

Free Software Foundation | Remote

March 2022 — Present

Helped organize mailing for end-of-year fundraising campaigns.
